---

July 31, 1998

To whom it may concern:

Terry Gardner did a snow blower design project for us in the winter of 97-98. It involved mounting an engine driven snow blower on an ATV. We gave him some basic ideas and parameters and then a free hand to develop this project.

He did an excellent job of design, overcoming many seemingly impossible obstacles. His Auto Cad and design lay out skills are excellent. The project is a complete success! I would be happy to provide more information for the asking!

Sincerely,

Tim Radniecki, Production Manager
